

Instructions for use

Use Only As Directed:

Digi Coat Clear Sublimation Coating is a high quality multi-purpose receptive clear coating for use on virtually any surface. Several thin coats are always better than one heavy coat.

Preparation Prior To Use:

Shake Can Well for 1 minute.

Ensure the surface to be coated is clean dry and free from grease. (For glass & ceramic prime surface with Digi Coat Adhesion Promoter).

Directions for Use:

Spray at room temperature.

For best results spray product approx 250mm from surface using light passes.

Use multiple passes to obtain high gloss finish.

Allow to air dry for 10 mins and then cure in oven at 160C for 15-20 mins.

Coverage approximately 2m²

Safety:

Pressurised container. Protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn even after use. do not spray onto a naked flame or any incandescent material.

Irritating to eyes. Repeated exposure may cause skin dryness or cracking. Vapours may cause drowsiness and dizziness. Keep out of reach of children. Keep away from sources of ignition - No smoking. Do not breathe vapour/spray. Avoid contact with eyes, rinse immediately with plenty of water and seek medical advice. Use only in well ventilated areas.
